

# Aronia Digital Twin Group

Leading Digital Transformation,  
Open to Collaborate with Global  
Companies

we are visionaries committed to  
advancing digital twin technology  
across the AEC industry and beyond.  
In addition, we offer a state-of-the-art  
digital transformation platform.  
Focus on seamlessly integrating  
Building Management Systems (BMS)  
& IOT and Building Information  
Modeling (BIM). Our mission is to  
revolutionize industries through the  
power of digital twins.

*The future is digital, and it's here*

*Revolutionizing the  
future with a digital  
replica of the present*

# Working With Us

Your Digital Mirror to Reality Harness the power of our Digital Twin technology. By merging advanced 3D visualization techniques such as laser scanning with BIM methodology, we craft a digital mirror of the physical world, encapsulating every detail into precise and interactive 3D models. Our State-of-the-Art 3D Model Viewer Visualize the Digital Twin like never before. Our bespoke viewer application lets you dive deep into the model, ensuring an immersive and detailed digital exploration.

## What We Offer

### BIM METHODOLOGY

Streamline projects with BIM expertise, now amplified to encompass the entire project life cycle for richer data connections. Our cost-effective approach ensures accessibility while promoting the adoption of sustainable practices in AEC projects.

### DIGITAL TWIN PLATFORM

Step into the future with our integrated Digital Twin Platform. Monitor, maintain, and optimize assets in real-time with unparalleled precision, harnessing the potential of data to drive transformative enhancements. Our solutions are purpose-built to be ensuring your success in achieving your sustainability objectives. Moreover, this platform plays a pivotal role in reducing operational costs, enhancing risk management, and optimizing overall operations.

### 3D SCANNING

Capture real-world data, incorporating contextual metadata for a comprehensive digital representation.

### BMS INTEGRATION

Optimize buildings with IoT/IIoT and Sensors, making data adaptive and intelligent for building management. Our approach supports operation in building operations, essential for efficient and eco-friendly practices.
